ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: FLUORO-ALKYL-CYCLOPEPTIDE DERIVATIVES HAVING ANTI-INTEGRIN ACTIVITY

(57) Abstract: Compounds of formula (I) cyclo [NX₁-R₁-CO-NX₂-R₂-CO-NX₃-R₃-CO-NX₄-CO-NX₅-R₅-CO], wherein at least one
x-fluoroalkylated amino acid is present, are inhibitors of integrins, particularly those belonging to the $\alpha_v\beta_3$ and $\alpha_v\beta_5$ family, and thus
are useful as medicaments, particularly for the treatment of the underlying diseases responsible for abnormal angiogenesis, such as
retinopathy, acute kidney failure, osteoporosis and metastases. The compounds described herein are also useful as diagnostic agents,
when appropriately labelled, especially for the detection and location of small tumour masses and arterial occlusion events.
